

2016 SHELBY GT-H

In 1966, Carroll Shelby and Hertz saw an opportunity to put customers in the driver's seat of high-performance special edition Shelby's. Ford supplied the new Mustangs with V8 engines and mostly automatic transmissions, Shelby added extra performance and style and Hertz gave the public access to a unique driving experience through what was known then as its new "Rent-A-Racer" program.

Shelby American built 1,000 total 306 HP G.T. 350H "Rent-a-Racers," giving a whole new audience a chance to experience Shelby performance first-hand. Fifty years later, Shelby collectors worldwide clamor for these cars.

Fast forward 40 years to the 2006 New York Auto Show, a rekindled relationship between Shelby and Ford Motor Company and the car that brought it all together: the modern-era Shelby Ford GT-H. The black with gold stripe cars were built on the 4.6L V8 Ford Mustang GT and given Shelby performance and visual upgrades including a cold air intake, performance exhaust and special, polycarbonate hood and fascia. Making about 320 HP, 500 coupes were first built with 500 convertibles offered the following year.

On the 50th anniversary of this groundbreaking program, Ford, Hertz and Shelby are proud to introduce the 2016 Shelby GT-H. Building on the immensely popular 435HP 5.0L V8 Ford Mustang GT, Shelby once again enhances the styling and performance of the Mustang with Ford Performance components including suspension, exhaust and wheels, along with the unmistakable Shelby design cues like polycarbonate hood and stripes. Beginning Memorial Day, 140 2016 Shelby GT-H's will be available for rent as modern-day "Rent-A-Racers" through the Hertz Adrenaline Collection at select U.S. airport locations.

2016 Shelby GT-H Performance Features (Available for rent at select Hertz U.S. airport locations)
