

## Self-drive Tips

**Speed limits and Driving Safety** – On interstate highways, the speed limit is sometimes raised to 75mph. Unless otherwise posted, the speed limit is generally 55mph on highways and 25mph in cities. By Nevada law, wipers must be on while driving in rain or snow. Listen to the radio for changes in weather conditions.

**Flashing yellow arrow turn signals** – The flashing yellow arrows will replace the existing green left-hand turn signals at certain signalized intersections across the state. When on, yield to oncoming traffic and pedestrians before cautiously enter an intersection indicated by the arrow.

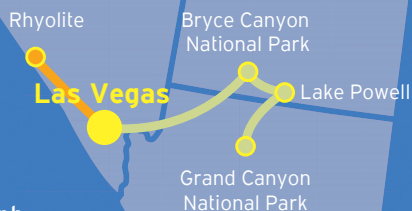

**Discover the Nevada scenic byways** – There are 20 scenic byways in Nevada comprising a total of 420 miles.
